---

Okay, thanks. FYI, here's a map of BP's four fenceline sites. The two south ones are about 1 mile apart.

Hi Motria,

We are discussing this here and will get back to you shortly.

Thanks!

Karen

Hello esteemed chemists – Have things settled down in your respective labs such that we could talk about starting a week-to-week comparison effort of tube/can samples? I checked in with BP-Whiting (northwest Indiana) and they have their fenceline system nearly functional. In addition to multiple auto-GC stations, it turns out they are also doing open-path VOCs. So we would be doing a 4-way method comparison!

Let me know what you think might be a realistic start date for paired sampling. The environmental engineer at BP is being very cooperative and I'm hoping to get something on her calendar.

Thanks!  
Motria
